Fadhil Lan

Frontend Developer at International Centre for Industrial Transformation (INCIT)
Batam, Riau Islands, Indonesia

Summary

6+ years experience to explore about programming and technology since study on campus until professional level at this point. As technology enthusiast, learning is a must consider the digitization increase rapidly to solve the problem that conventionally.

Working as Software Engineer in Software House Company is my first professional job in my journey to develop and customize the ERP Software features based on the client requirements.

Flexible to learn new stuff related to technology trends. Web development is my focus plan to improve my programming experiences. Does not rule out the possibility to learn other things related to technology, such as machine learning (part of AI), data science and analytics, Internet of Things (IoT), etc.
